DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed. The following is an examiner's statement of reasons for allowance:
2. The prior art such as Kohno et al. (USP 5,196,756) teach a method for producing a piezoelectric actuator and for polarizing the piezoelectric actuator, the method comprising: providing an actuator comprising a piezoceramic layer with two spaced electric contacts (see figure 1), applying the polarizing voltage during a cooling process, and limiting the voltage to a maximum value during cooling of the actuator (see column 3, lines 14-47).

However, the prior art as a whole fails to disclose or obviate a process comprising: heating the piezoelectric actuator up to a soldering temperature during the soldering process for soldering electric conductors to the electric contacts, wherein during the heating process a polarizing voltage is applied to the conductors.

This process of polarizing the piezoelectric actuator during the soldering process is therefore found to be novel and un-obvious, and as this limitation is clearly presented in all of the independent claims all of the claims are allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
